

Multisens - 3934i

Shaker Vibration Analysis.

Ultra Portable. User Friendly. Connected.

The Multisens-3934i App is a tool developed by SensOS with ultimate portability in mind. Use your iOS® or Android™ Device along with a triaxial wireless accelerometer as a portable Vibration Monitoring tool that allows users to perform Tests specifically designed for Screen/Shaker Applications as well as more general features like Vibration Meter, Time and Frequency Domain Analysis with instant pdf reports.

If you want to take it to the next level sign up for the full Multisens-3934 package and get full cloud capabilities for saving/loading reports and data, Machine Certification with embedded Machine Condition Detection along with the 3934 Vibration Analysis Studio iPad® App.

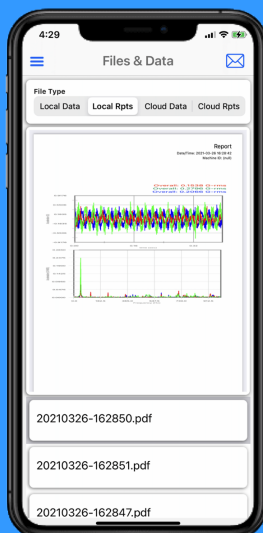

Key Features

- 1-3 Simultaneous Channels.
- Motion Type Designation, Linear, Elliptical or Circular.
- RPM Value.
- Total and Filtered G Value.
- Displacement.
- Stroke Length.
- Vibration Angle
- Automated Reports with Logos, Machine Info and Notes.

Standard Vibration Analysis Features

- Up 12800 Lines of FFT Resolution.
- TWF and Spectrum Cursors Auto/Manual adjustable High Peak and CPM.
- Spectrum Auto/Manual Adjustable Sidebands Active Cursors.
- Send Reports via MMS , email, and all major messaging Apps.
- Vibration Meter.
